Corporate Social Responsibility 2026 Hari Raya Food Donation Initiative

In March 2026, HSB partnered with KleanSG to organise a meaningful outreach initiative aimed at supporting families facing food insecurity in the Punggol community. Leading up to the Hari Raya festive season, this effort was designed not only to provide essential assistance, but also to spread warmth and care during this time of celebration.

FOOD PACK DISTRIBUTION

HSB x KleanSG

13TH MARCH 2026, 3PM

LOCATION
BLOCK 206A PUNGGOL PLACE

With generous sponsorship from HSB and collaboration with KLEANSg, we are coming together to deliver food packs to families in need and support those facing food insecurity.

As part of the initiative, HSB provided thoughtfully packed food bundles containing daily essentials such as rice, eggs, and cooking oil. These items were selected to help ease the immediate needs of households and ensure that families could prepare simple, nourishing meals for their loved ones.

Beyond the act of giving, what made this initiative truly meaningful was the human connection we experienced on the ground.

Our team had the privilege to interact directly with the residents, listening to their stories, and share small genuine moments of interaction. These personal exchanges served as a powerful reminder that even small acts of kindness can create a lasting impact.

This collaboration reflects HSB's continued commitment to corporate social responsibility and our belief that sustainable business success goes hand in hand with uplifting the communities around us.

By actively contributing to initiatives like this, we are fostering a company culture that values compassion, responsibility, and meaningful impact.

Singapore World Water Day 2026

Our water conservation efforts

HSB participated in this year's Singapore World Water Day 2026 by raising awareness on water-saving practices in dormitories and worksites across all project sites.

Our corporate team emphasized the importance of water conservation and challenges that Singapore face such as limited natural resources, increasing water demand and the impact of climate change.

Practical water-saving habits such as reducing water usage during daily activities and avoiding common wastage on site were shared. In addition, HSB's ongoing water conservation initiatives were highlighted, including:

- Reuse of treated ECM water for dust control, washing activities, and cooling measures.
- Rainwater harvesting systems for construction use.
- Implementation of Water Efficiency Management Plans with clear KPIs to monitor performance.

These initiatives demonstrate HSB's commitment to sustainable water management and reducing environmental impact.

Instead of discharging treated water into public drains where it would eventually return to reservoirs for further treatment, the water is directly reused for various activities that do not require potable water.

This approach reduces unnecessary treatment, conserves resources, and improves water efficiency by making immediate use of treated water for suitable non-drinking purposes.

Dust Control

Washing Vehicles

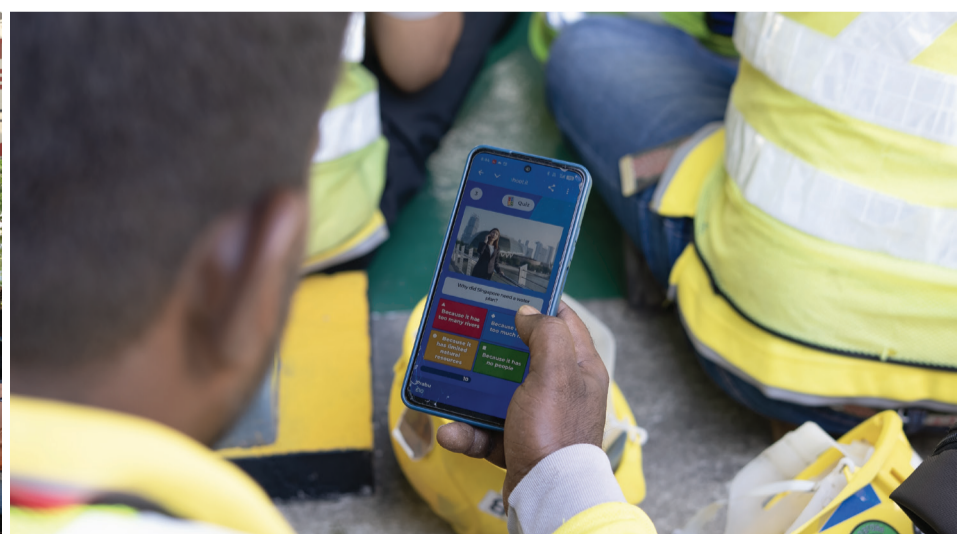

Other Non-potable Uses

Rainwater harvesting is another sustainable practice we have on site for the collection and storage rain from rooftops, reducing our reliance on potable water supply and promoting a more eco-friendly environment.

Workers remained attentive throughout and actively took part in an engaging Kahoot quiz at the end of the session, helping to reinforce key learning points.

Annual Dinner 2026

HSB’s Annual Dinner 2026 was held at the prestigious Singapore Island Country Club, bringing colleagues together for a memorable evening of celebration.

This year’s theme, *“When I Grow Up”*, brought a playful spirit to the event, with staffs dressing up as professions they once aspired to be. Their costumes added colour, laughter and lively energy throughout the night.

Guests were treated to a delightful programme featuring entertainment, delicious food, and plenty of opportunities to connect and unwind with one another.

A special moment for the night was the recognition of **16 Long Service Award recipients**, honouring their dedication, achievement and invaluable contributions to the company over the years.

Another highlight of the night was the lucky draw segment. We would like to extend our sincere appreciation to all of our sponsors for their generous support, which made this segment possible!

The celebration continued with lively stage games, laughter, and shared moments of joy, creating a warm and festive atmosphere.

The evening was a great success, bringing everyone closer together and creating lasting memories. HSB looks forward to yet another remarkable celebration next year!

PLAY & WIN

QUESTION

1. How does the food donation initiative reflect HSB's values and culture?
2. What water conservation measures have already been implemented on site? Additionally, what innovative strategies can we introduce to further conserve electricity and water?
3. What is the theme for this year's annual dinner?
